## Live Video FMS Telematics

### About SmartSight

SmartSight from EDT is a competitively priced live-video telematics service designed to improve driver and asset safety for increased savings and profitability.

Integrated with multi-sensor packed front and rear cameras, SmartSight streams live-video and events from your vehicles to the cloud over the mobile network to provide 24/7 monitoring of your fleet, assets, drivers and passengers.

### Main Features

- » Reduce accident claims cost with live evidence of what happened before and after the accident.
- » Minimize vehicle idling with GPS tracking, tracking history and data on driving.
- » Savings on cellular data plans with built-in WiFi hotspot.
- » Lower cargo theft with live-video view.
- » Increase driver's liability and engage employees in improving safety with data on driving behavior.
- » Improve operation visibility with dash cam footages and live alerts.
- » Improve drivers and passengers safety with real-time panic button.
- » Provide instant assistance and assess damages from the field in real-time.

### System Highlights

- » LTE 4G/3G Support
- » Includes HD front and rear cameras
- » Wide-angle interior car camera lens
- » 32GB SD card for loop recording
- » Mobile and WiFi connectivity - (acts as a WiFi hotspot)
- » High resistance to heat or extreme cold-suitable for vehicles
- » Parking mode standby support
- » Driving analytics and reports
- » A cloud-based, multi-language localized Interface management platform to manage multiple vehicle groups
- » Event log and instant video preview of events
- » Multi-sensors for acceleration, accidents, geofence and more
- » Bookmarks - view selected cameras from different vehicles in a single view
- » Secure video sharing inside and outside the network

### WorldFleetLog

EDT's WorldFleetLog cloud-based tracking and monitoring solution provides real time vehicle status and driver behavior data. With hundreds of ad hoc and automatically generated reports based on user-defined parameters, the WorldFleetLog Fleet Management System can make a significant contribution to improved fleet management in any economic sector.
